

January 10 - March 15, 2024

Big Creek Shaft Grout Plant

What: Our contractor will be installing and operating a grout plant in order to supply material for the strengthening of the Mountain Tunnel, which is accessed via the Big Creek Shaft. This work is part of the SFPUC Mountain Tunnel Improvements Project and is important work to assure future water delivery to 2.7 million residents.

How: To minimize disruption to nearby properties, multiple noise mitigation measures will be implemented.

When: Construction will begin in January 2025 and run through March 15th. The plant will be in operation 24 hours, with most vehicle and construction activity occurring during daylight hours. Weather and/or construction issues may impact the schedule.

Where: Within the limits of SFPUC property located in and around the Big Creek Shaft (see map)
