

30 DAY CONSTRUCTION NOTICE

WATER SYSTEM IMPROVEMENT PROJECT

Parnassus Avenue Water Main Replacement Project

When: Construction is anticipated to begin on March 3, 2025 with completion anticipated by Spring 2026. Weather and construction issues could impact the schedule. General workdays and hours (weather permitting) are Monday – Friday, 8:00 a.m. to 5:00 p.m. Some night and weekend work may be required.

Where: Work will occur on Aloha Avenue from Funston to 15th Ave.; Funston from Aloha to Lawton; Lawton from Funston to Locksley Avenue; Locksley from Lawton to 6th Avenue; 11th Avenue from Parnassus to Kirkham; 6th Avenue from Locksley to Judah St; Kirkham from 7th Avenue to 6th Avenue; Judah St. from 6th Avenue to 5th Avenue; and Parnassus from 5th Avenue to Stanyan Street.

Why: To ensure reliable water service in your neighborhood, we are replacing pipes that are approaching the end of their useful life and installing new water mains.

What to expect during construction: Water main installation is done in phases, so work will not be happening on your block for the entire project duration. There may also be periods of inactivity during the work dates. Local access for residents will be provided at all times during work hours, though there may be some slight delay to enter or exit your property/driveway to allow for crews to create a safe path of travel.

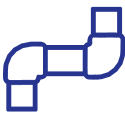

Contractor will place “no parking signs” on street where construction will take place 72 hours in advance per San Francisco Municipal code. Parking is prohibited in the work zone only during construction hours.

Contractor will excavate a trench where new water main pipe is to be installed. There will be noise, vibration, dust, parking and traffic impacts in the work zone and some disruption to normal neighborhood activity.

Contractor will install pipe and refill the trench with special materials to protect the pipe. The contractor will temporarily pave the excavated area and return at a later date for the final paving. Temporary paving could be in place for weeks or even months on larger projects.

SF Water Department will connect new water main pipe to properties. This will involve a temporary interruption of water service. Crews will provide advance notice a minimum of 24 hours.

Once the entire project has been completed, final paving is performed. All equipment and materials are removed from street.
