

10 DAY CONSTRUCTION NOTICE

WATER SYSTEM IMPROVEMENT PROJECT

San Francisco Zoo Recycled Water Project

When: Construction is anticipated to begin on August 12th 2024 with completion anticipated by fall 2025. Weather and construction issues could impact the schedule. General workdays and hours (weather permitting) are Monday – Friday, 8:00 a.m. to 5:00 p.m. Some night and weekend work may be required.

Where: Work will occur along Sloat Boulevard from 43rd Avenue to Skyline Boulevard.

Why: We are replacing the San Francisco Zoo's non-potable groundwater supply with recycled water. The project will construct a recycled water main as well as install mechanical and electrical components.

What to expect during construction: This project will be done in phases, so work will not be happening in the entire project area for the full project duration. There may also be periods of inactivity during the work dates. Local access for residents will be provided at all times during work hours.

Contractor will place “no parking signs” on street where construction will take place 72 hours in advance per San Francisco Municipal code. Parking is prohibited in the work zone only during construction hours.

Contractor will excavate a trench where the recycled water main pipe is to be installed. There will be noise, vibration, dust, parking and traffic impacts in the work zone and some disruption to normal neighborhood activity.

Contractor will install pipe and refill the trench with special materials to protect the pipe. The contractor will temporarily pave the excavated area and return at a later date for the final paving. Temporary paving could be in place for weeks or even months on larger projects.

Once the entire project has been completed, final paving is performed. All equipment and materials are removed from street.
