

SEWER SYSTEM IMPROVEMENT PROGRAM | Grey. Green. Clean.

The Kansas and Marin Streets Sewer Improvements Project

Estimated Construction Schedule

Our Sewer System Upgrades are Underway

The San Francisco Public Utilities Commission (SFPUC) operates a combined sewer system that collects and treats San Francisco’s wastewater (sewage and stormwater). Our Sewer System Improvement Program is upgrading and modernizing our system to ensure we can continue to protect public health and the environment now and into the future. As part of these citywide investments, the proposed Kansas and Marin Streets Sewer Improvements Project is intended to increase the hydraulic capacity of the sewer system to reduce the risk of localized flooding during heavy rains. This Project proposes to construct:

- An 8-foot diameter, approximately 900-foot long sewer tunnel,
- Two connecting underground concrete sewer structures, and
- Restoration of existing surface features.

Project Benefits

- Increase hydraulic capacity of the sewer system, which along with other projects, would help reduce the risk of localized flooding during heavy rains.
- Enhance system resilience by construction of new facilities to meet current seismic standards and sea level rise requirements.
- Ensure the system can continue to protect water quality and aquatic life in the Bay.

SFPUC has elected to utilize a Design-Build delivery method for the project, with proposed Contract DB-131, Kansas and Marin Streets Wet Weather Conveyance Tunnel. When available information for the Design-Build contract will be posted on the SFPUC Contract Administration Bureau webpage at contracts.sfwater.org, with the following anticipated schedule:

SCHEDULE DETAILS (subject to change):

Advertise Request for Qualifications:
Summer 2019

Advertise Request for Bids:
Fall 2019

Construction/Design-Build:
Summer 2020–Summer 2022

Design-Build Contract Estimate:
\$14 million

PROJECT LOCATION MAP

What to Expect

- **SEWER SERVICE** in the area will NOT be interrupted during construction.
- **DURING CONSTRUCTION** businesses and residents in the work zone will maintain access to their driveways and entrances during construction.
- **NOISE IMPACTS:** Neighbors may hear construction noise periodically. Noisy work will be conducted in compliance with the San Francisco Noise Ordinance.
- **PARKING IMPACTS:** Street parking will be impacted near construction zones. “No-parking” signs will be posted 72 hours in advance.
- **NOTICE:** Construction work hours will be provided when finalized and before the start of construction.

About the Sewer System Improvement Program

The Kansas and Marin Streets Sewer Improvements Project is part of the Sewer System Improvement Program (SSIP), a 20-year, multi-billion-dollar citywide investment required to upgrade our aging sewer system. The program is the result of an extensive community planning process and will ensure a reliable, sustainable and seismically safe sewer system now and for generations to come. For more information on SSIP and to stay up to date, please visit sfpuc.org/ssip.
