

Construction Notice: Wawona and Vicente Street Stormwater and Water Main Replacement

Description: As part of the Sewer System Improvement Program, the San Francisco Public Utilities Commission (SFPUC) will install a new sewer pipe under Vicente Street, from Wawona Street to 34th Avenue, and replace the aging water transmission and distribution mains on Wawona Street, 15th Avenue, and on Vicente Street west of 19th Avenue.

Contact: SFPUC Communications, (415) 554-3233, ssip@sfgwater.org. After hours: KJ Woods, (415) 780-7101. Learn more at sfpuc.org/vicentewawona.

When: Crews will begin construction activities April 25. Workdays and hours (weather permitting) are Monday – Friday, 9:00 a.m. to 6:00 p.m.

- Crews will begin morning construction activities after student drop-off activities by 9:00 am.
- Crews will halt work during student pick up hours of 1:45 pm to 2:30 pm, temporarily pulling back the construction zone to provide two lanes of westbound vehicular traffic on the northern side of Vicente Street.
- In an effort to expedite construction activities at this location, work hours will be extended to 6:00 pm.

Construction activities on this block are anticipated to start 4/25/22 and complete 5/27/22.

Where: This segment of construction activities will occur in the roadway of Vicente Street between 25th and 24th avenues, with traffic control measures extending one block east and west (see map opposite side). Crews will then move east one block along Vicente Street for construction at the next block for 2-3 weeks, eastward towards 20th Street.

What to expect:

- While the contractor is required to abide by the City's noise and vibration ordinances, **neighbors should expect increased noise and vibration during this work**. The project team will work to minimize disruption to normal neighborhood activity; however, there will be occasional inconveniences due to heavy equipment movement and other construction activities
- Through traffic during the work activities will remain open
- Some parking will be impacted for staging of equipment along the cross streets adjacent to Vicente Street (see map opposite side), advanced notice will be given
- Businesses and residents in the work zone will maintain access to their properties (including entries, driveways, garages), although there may be temporary delays
- No interruption in sewer service is expected during construction, interruption to water services may occur in which advance notice will be given

Sewer improvements are funded through the Sewer System Improvement Program (SSIP) – a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfpuc.org/SSIP.
