BLUEPRINT FOR SAVINGS

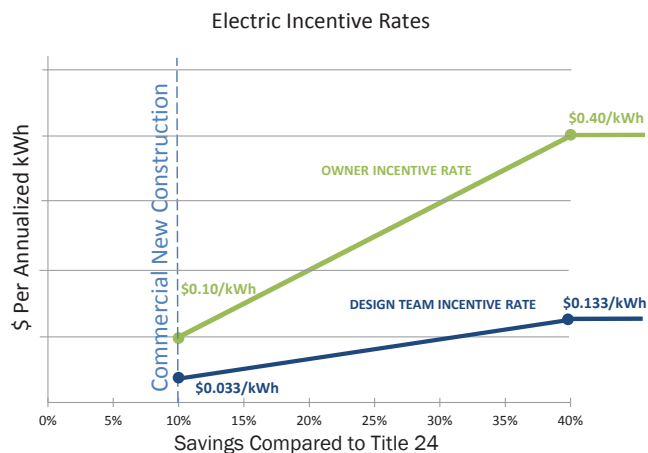

Commercial New Construction Energy Efficiency Program

BUILDING GREEN

The San Francisco Public Utilities Commission (SFPUC) Blueprint for Savings program is designed to help building owners and designers construct highly energy efficient buildings and to reward them for exceeding performance standards. The program offers design assistance and cash payments to building owners and design teams. To be eligible, buildings must be non-residential commercial and industrial schedule electric accounts, and the new construction or major renovation project must be at least 50,000 square feet and in the pre-construction phase. Projects must be at least 10% more energy efficient than required by California's Building Energy Efficiency Standards (Title 24, Part 6).

Owner Whole Building Incentives - up to \$150,000

Design Team Whole Building Incentives - up to \$50,000

Owner Peak Demand Incentive Rate: **\$150/kW**
Design Team Demand Incentive Rate: **\$50/kW**

BLUEPRINT FOR SAVINGS

offers:

- Technical design assistance to support the design of high efficiency buildings.
- Cash incentives of up to \$150,000 per project for building owners.
- Cash incentives of up to \$50,000 per project for design teams.

DESIGN. BUILD. SAVE.

DESIGN ASSISTANCE

Design assistance is provided in coordination with the owner and design team. We work with you to help identify solutions that work for your building and design. We help owners and design teams to be well-informed when choosing which design features to incorporate into the building.

FINANCIAL INCENTIVES

Financial incentives are payments to owners and design teams for the construction of highly energy efficient buildings. These payments are based on the energy use of the project as constructed.

CLEAN ENERGY

The San Francisco Public Utilities Commission supplies 100% greenhouse gas-free electricity that includes hydroelectric power generated by the Hetch Hetchy System and other renewable energy we generate locally. By using energy efficiently, Hetch Hetchy Power customers help to steward this precious resource.

WHY BUILD EFFICIENT?

Exceeding the minimum energy code helps your project succeed, whether your goal is LEED certification, zero net energy, or improved net operating income. Energy efficiency is a key strategy for the new generation of distinctive sustainable buildings that earn higher rents, provide healthier work places, and have smaller environmental footprints.
